Work Experience

SALT

November 2020 - Now

I am currently working at SALT. A Digital Transformation for Marketing agency specialized in marketing technology based on data analytics.

The project that I handle, is **Dunia Games (duniagames.co.id)**, Indonesia's most reliable gaming news portal. We have the latest infos of video game, gaming industry, eSports, tech, and pop culture.

The technologies that we used there is Angular. There are several development features that I have worked on at Dunia Games, including Google Adsense Setup, Force Username page, News and Update Page Landing, Tournament Landing, My Profile, Videos and Playlist page.

At SALT, I'm also working on another project, namely **Klop! (klop.co)** as Front End Engineer in the Operations Team.

The technology we use there is ReactJs. There are several operational features that I have worked on at Klop!, including Redirect Disclaimer Device Page, Credifaz Administrative Area Form, Relational Logic Education Employment Field, Set Google Analytics Data Layer, and Craete Klop Admin Page.

Gomodo

January 2019 - October 2020

I have almost two years of experience at startup company, Gomodo. Gomodo is an online booking and payment system for micro, small, and medium enterprises in the services and tourism industries that comes equipped with useful tools such as e-invoicing, promo code generators, digital ads booking forms, and other great supported features.

As a software as a service (SaaS), Gomodo makes a product, maintains it, and develops it. I am in charge of running web development from the client side. At the company I learned a lot of things, especially related to technical matters regarding web development. The technology we use there is NuxtJs (Vue), Laravel, NextJs (React), Jquery, etc.

There are several projects that I have worked on at Gomodo, including B2B Landing Page, Redesign Gomodo Dashboard, Gomodo Storefront, Lets Go Travel BNI, also Bug Fixing and Create New Feature.

Programming Tutor

August 2018 - December 2018

I have experience as a tutor of basic programming logic for children. There I was assigned to teach elementary and middle school age children to fund basic logic programming. The applications used are Scratch and Thungkable. The material taught is looping logic, branching, and other fundamental programming materials, all of which are studied coolly in the form of making games.

Math Tutor

July 2017 - November 2018

Become a Mathematics Tutor in Gamma Exacta Tutoring, Kindy Educa, and Exel Privat. My job is teach mathematics for High School, discuss exam questions with them, and provide additional competence in the form of quick ways to work on math problems, both by teaching the in class room and the private.

Education

Mathematic

2012 - 2017

I got my bachelor's degree in mathematics after studying at the state Islamic university of Sunan Kalijaga Yogyakarta. There I learned a lot about mathematics, basic programming, and some organizational activities. When I graduated, I got a 3.57 GPA.

Computer and Network Engineering

2009 - 2012

Since I was in elementary school, I was obsessed with the computer, so I took computer and network engineering major in my hometown schools, namely SMK PGRI 2 Ponorogo. There I learned many things about installation, repair, maintenance of computers and networks.
